Subject

Maintenance of Water Supply to Towns

Reference

Dewan's Special Memo No 1191 of 16th June 1928

(Submitted to the Third Member of Council.)

2 In the Special Memo referred to above, Government notice that in -- none of the towns for which water supply is given, is the system working -- quite satisfactorily, and that either - the Pumping Machinery is defective, or the Filtering inefficient

3 All the water supply schemes were at one time under the control of this Department, viz , those of Davangere, Harihar, Shimoga and Nanjangud in addition to the water works of Bangalore, Mysore and Kolar Gold Fields Th maintenance estimates were being prepared and sanctioned and the outlay incurred in this Department in the first - instance, the charges being subse-

subsequently debited to the Municipal - Bodies The Municipal Bodies considered that the charges they had to bear -- were rather high and wished to manage -- the water supply systems themselves, as - they considered that they could work the more economically, and the works were --- therefore transferred to the Municipalities concerned The Pumping Plant of - the Davangere Water Works is not working efficiently The Shimoga Water Supply Scheme now improved, is not maintained - satisfactorily A few years after the Chickmagalur Municipality took over the Water Works after they were completed, there were complaints of shortage of -- supply, (due to inattention on the part of the staff.) The Nanjangud Water Works since their transfer to the Municipality have had frequent breakdowns (It is -- evident that though the Municipalities have effected savings in working costs, it has been at the expense of efficiency A Pumping Plant cannot be run efficiently if you do not use the best lubricants and attend to timely renewal of worn out parts for which sufficient spares have - to be kept, and lastly, to cut down the -- staff so that the men are overworked --- must result in the deterioration of ---- machinery

4 It is therefore desirable that all these water supply system should be retransferred to the Public Works Depart-

ment so that they may be placed under the Water Supply Division, where they will have expert professional supervision

The Deputy Sanitary Commissioner is also of the opinion that all water works should be in charge of Government Technical Departments

5 There are at present a number of water Supply Systems under the Manage ment of the Municipal Bodies as noted -- in the margin

1	Kolar	A
2	Chintamani	
3	Nanjangud	B
4	Yedatore	
5	Magadi	C
6	Tumkur	
7	Chickmagalur	D
8	Kadur	
9	Kudigere	
10	Kalasa	
11	Koppa	
12	Davangere	E
13	Harihar	
14	Shimoga	

6 I propose that (A) Kolar and Chintamani Water Works may be attached to the Superintendent, Kolar Gold Fields Water Works (B) Nanjangud and Yedatore to the Superintendent Vani Vilas Water Works, Mysore (C) Magadi and Tumkur to the Superintendent, Chamarajendra - Water Works, Bangalore (D) The Water Supply Schemes of the Kadur District - will have to be placed under a Sub Divisional Officer of the Rank of a Sub Engineer with Chickmagalur as Headquarte and the usual Sub Divisional Staff (E) Davangere, Harihar and Shimoga may be constituted into a Sub Division with Shimoga or Davangere as Headquarters In the case of (A), (B) and (C) groups, the Municipalities may be debited with the cost of the additional clerical -- staff and the Travelling Allowance char of Superintendent in proportion to the quantity of water consumed In the - case of (D) and (E) the whole co t

the Sub Divisional Staff will have to be distributed in proportion to the quantity of water consumed.

7 As regards the staff for the - Water Supply Stations, the men now employed may be transferred over to the - Water Supply Division and the Executive Engineer will be asked to study the requirements of the stations and submit - proposals for modifications where considered necessary

8 A statement showing the establishment required for each Sub Division and the Division Office on account of -- extra work involved is put up (Slip C

9 The favour of orders is solicited

1) From the replies so far received it is seen that the Nanjangud, Chikmagalur and Shimoga Municipalities and Kadasa village Panchayet are in favour of transferring the works to the charge of the P W D and those of Davanagere, Harihar, Munzerabad, Hospet, Chintamani and Yedatore are not in favour of such transfer, while the Kolar Municipality is agreeable to transfer on control to the Superintendent K G F water supply works after the project on hand is completed

2) The opinion of the Tumkur Municipality is still awaited. No opinion has been received as regards Kadur and Hunsur Municipalities has not been consulted.

The consent given in the case of Chikmagalur Shimoga and Kadasa is subject to the condition that the maintenance charges should not exceed the average cost for the past two years and Rs 1444 a year respectively

If opinion of Hunsur and Kadur Municipalities are received before the case is submitted to Government, they may be considered.

DS 8/11/29

DS 8/11/29

1 Information may be called from the Hunsur & Kadur Municipalities also

2 The Reply from the Tumkur Municipality is due to which an urgent Reminder may issue

After the issue of the above, the file may be sent to the Secy. for favour of perusal on the conditions proposed by the Shimoga Municipality.

53 Revised statement submitted

56 These papers relate to the proposal made in the Dewan's minute dated 16th June 1928 for the transfer of the control of the waterworks in Municipal towns to the Public Works Department, with a view to secure satisfactory and efficient water supply arrangements

57 The note by the Secretary Public Work Department dated 23rd November 1928 explains the previous history of question and makes proposals for the transfer of the water work to the Public Works Department

58 The proposal of the Public Works Secretary was referred to the several Municipalities for opinion under the orders of the II Member in para 6 supra, and the opinions received are summarised in the Statement put up below It will be seen from the Statement that of the ten Municipalities which are not in favour some base their conclusion on financial grounds, viz that the slender resources of the Municipality do not admit of additional expenditure on account of the Public Works Dept supervising agency while others state that the existing arrangements are quite satisfactory and that there is no necessity for the proposed transfer Reference is invited to the opinion of the Davangere Municipal Council which also says that their past experience with the Public Works Agency does not support the proposal for the transfer

59 Of the five Municipal Councils which have agreed to the proposal only two agree unconditionally the other

NOTE—Con n Sheet

Transfer of control over water supply in ~~[illegible]~~ to BWSSB

File No [illegible] of 193[illegible]

General and Revenue Secretariat

three make conditions as to the ~~control~~ limit of the cost to be incurred

6. Since the majority of the Municipal Councils consulted are not in favour of the proposal it is for consideration if the matter has to be pursued further There is also the legal difficulty pointed out in para 48 above - viz the absence of provision in the Municipal Regulation for enforcing the arrangement against the wishes of the Municipal Councils Or this point, the Law Department may be consulted

(7) As under the Government Order of 19-3 1932 the entire control over water supply is now vested in the Bureau of Sanitary Engineering except in Bangalore City The Director of Health may also be consulted, in case the proposal is to be sanctioned

(Secretary) AM 1/12

There is no doubt that a central agency with the necessary technical knowledge can look after these various systems much better than the local Municipal Councils now The Sanitary Engr may be consulted then the Dir of Health

systematic and
Engineering would result in/more careful inspections of plants and changes for increased efficiency of plant operation may be carried out more easily

There will no doubt be strenuous objections raised by some Municipalities against the transfer of the management of their water supplies But it must be pointed out that the technical training and experience for efficient water supply and maintenance does not come within the scope of the Municipal Councillors and should be vested in a special Bureau organized for the purpose of concentrating technically trained men with water supply experience for this work

Forwarded with compliments and requested to the Director of Health for favour of furnishing the information

By order
Asubba Rao
Secretary to Government

(1) Retransmitted with compliments to the General Secretary to Government

(2) 1 It is very desirable that all piped public water supplies in the State are under Government management, for efficient maintenance Not only is it necessary to see that the plant works satisfactori but that also the quality of water is above suspicion bacteriologically

2 A list of water works in the State is on the file Since the Bureau of Sanitary Engineering was formed, the following additional water supply installations have come to existance Altogether therefore to date there are 30 installations exclusiv of Bangalore and Mysore Cities and the Kolar Gold Fie

dditional Water
pply installations

Santhemarahally
Madhugiri
Malur
Doddaballapur
French Rocks
Channapatna
Hosadurga
Turuvanur

3 If Government are pleased to reduce the supervision charges to a uniform rate of 5 per cent instead of 18 per cent insisted upon by the Financial Department, it is not likely that the Local Bodies will object to transfer the installations to Government management Such reduction is not new For instance in the case of Kol r and Madhugiri the supervision charges are only 5 per cent

ontn Sheet

File No 1928 of 1928 — General and Re Secretar

1 to 3

4 In the file there are proposals by the Chief Engineer for formation of sub divisions for looking after the maintenance works The estimated cost of these proposals is about Rs 15,000 a year

1 to 5 It does not seem immediately necessary to incur all this expenditure The Bureau of Sanitary Engineering with an additional allotment of Rs 6000/- a year towards small staff and Travelling allowances will be able to manage all these installations for the present Of course, with the increase in the number of installations, the cost will also proportionately increase All this addition can with the more or less Supervision charges

1 to 6 It is again urged that the water supplies are taken over by Government for management

Director of Health

Read 7/9/34

(15) Retransmitted with compliments to the Secretary to Government, Development Department

(16) In the Note, it has already been pointed out that supervision charges of 5 per cent on the annual maintenance estimate of each water works be debited to the various Municipalities and that the small extra staff and the Travelling Allowance required may come to about Rs 6,000 per year which could be met out of the supervision charges of 5 per cent to be recovered from the Municipalities An exhaustive list of water works in the State is attached herewith As regards the extra staff that may be required in the Sanitary Engineer's office only one extra clerk who can also look after the Stores is necessary It is suggested that the Chief Store Keeper now working in the Water Supply Division may be transferred to the Bureau

(17) As regards the date from which the new system may be given effect to, it is suggested that the taking over of water supplies may commence straight away, so that by the end of December all the water supplies would have been transferred to the Department

124 The proposal is that the management of the water works in certain places, be taken over from the respecti Municipal Councils and entrusted to the Bureau of Sanitary Engineering This proposal appears to have been made on the ground that in many of the Municipalities the water works are not maintained satisfactorily and Government consider that a central agency with the necessary technical knowledge can look after these work much better than the local Municipal Councils and that under such an agency inspection of plants and machinery can be conducted more easily and systematically and their efficient working secured

125 The proper maintenance of water supply is one of the functions of Local Bodies and the charges connected with the same have to be borne by them It is for consideration whether the withdrawal of the administration and control of the water supply by the Local Bodies is really a desirable step and whether the disadvantages in it are not more than the possible advantages that might be expected Recently the Bangalore City Municipality had requested Government to transfer management of the Bangalore City Water supply to them and it is reported in the papers that the Dewan had promised to consider the request favourably if they pai the prescribed amount to Government

126 The transfer of the entire administration and control of water supply arrangements to Government will

—Contn Sheet

WD 0 955—GPB—22 500—12 6 34

apart from being regarded as a retrogade step in development of Local Self Government involve the following difficulties and disadvantages

(1) The Government will make themselves responsible for all shortcomings in the water supply arrangements to whatever causes they may be attributable some of which may even be beyond their control

(2) If the management should be in the hands of Government, the pay of the staff and other maintenance charges will have to be disbursed by Government in the first instance From which source these charges will be met in the first instance is not clear If they have to be financed by Government in the first instance and the amount met recovered from the Local Bodies there is every chance of ~~the~~ a portion of the charges remaining unrecovered for the following reasons -

(i) The Local Body may not be in a position to meet these charges

(ii) The Local Body may be unwilling to pay these charges to Government and may delay payment for some reason or other

The finances of some of the Local Bodies are not very sound and some of them -- Chennapatna Dodballapur Malur etc -- are not in a position to meet their existing commitments and have defaulted in the payment of dues to the Electrical Department etc Even the City Municipalities of Bangalore and Mysore have not been paying regularly the water supply charges incurred by Government and the

Serial No

expenditure incurred by Government is thus remaining unrecouped In such a state of affairs it would be

X uncommon advisable for Government to incur expenditure in the first instance on behalf of these Bodies

(3) It is stated that the staff now employed for tl several water works should be transferred to the contro of the Bureau of Sanitary Engineering The Government order is not clear whether they will have to be treated as Government staff and who should bear pensionary liability in respect of thea for (i) past service and (ii) service under Government

(4) The proposal also involves fresh expenditure on account of supervision charges and t a of the supervising agency extra cost in bringing to a uniform level the pay of the staff working in various places and under Local Bodies with varying resources and ability to pay

127) Even if Government management is considered preferable it may well be left in the hands of the District Executfve Engineers instead of being centralise in the Water Supply Division at Bangalore In special cases the latter might be consulted This would be disadvantageous and involve extra cost and delay

128 It may perhaps be a better arrangement involving no disadvantages to continue the present arrangement and render all possible technical assistance to the Municipalities to manage the water supply arrangements satisfactorily Government may lend the technical staff which may be required by the Municipalities and may

1st 1/

Sir

L2683

1412 With reference to your letter No L 4449-55/L1 192-28-2 date 22nd December 1928 forwarding a copy of note No 631 dated 26th November 1928 o the Secretary to Government P W D suggesting measures for the efficient and satisfactory working of the water supply schemes in the marginally noted municipalities and requesting me to consult and intimate the views of the municipalities concerned in the matter &c I have the honor to state that they are not in favor of handing over the maintenance &c to the P W D

1 Davangere 2 Harihar

Copies of the reports received from the Presidents and their enclosures are forwarded herewith for information

I have the honor to be,

S I R

Your most obedient servant,

Try Assistant Commissioner
For Deputy Commissioner
Chitaldrug District
(Absent from station)

Remarks of the President on the inspection Notes dated 15-8-1926 of the Executive Engineer, Water Supply Division

Not wholly true Only last year some work was done to them As regards some of the buildings at least, I was informed by the Engineer that temporary repairs would be of no use as the fourdations themselves were faulty and it wa better to wait till they had become absolutely insecure when thorough alterations could be made once for all This is apparently due to the fact that they are so observed with 'Technical' pride that they cannot brook so called laymen taking any interest in the works If so it is left to them to become more broa minded and this become contended and happy without brooding over imaginary grievances the outcome of false pride and dignity So far as I am concerned I have always tried by frequent visits to the works and consultation with the men to understand their difficulties and help them as far as possible I have supported them whenever I thought they were right even against the councillors themselves and given them a free hand under m own responsibility whenever the occasion demanded But if what the staff mean by a free hand is that they should be given complete liberty to order for a thing and every thing irrespective of the cost at their own sweet will and pleasure and to incur a y amount of expenditure at all without the council so much as even dosing to scrutinise their actibns, then I am sure they are asking for too much "He who pays the piper,calls the tune " and the council has every right to scrutinise all large items of expenditure and purchase of costly machinery &c with a view to husband their resources and to ensure efficiency with economy But from my personal experience of the present municipal Engineer it would appear that he cannot bear s ch scrutiny and seems to feel it an insult to be even asked to obtain proper orders of the council or the President before placing orders I cannot see the justification for such an attitude From some reason or other there is strong suspicion among the councillors against the water works staff for some years past owing, as I understand, to the questionable conduct of som former hands and hence they naturall wish to exercise some control over the expenditure This can by no means be called 'undue interference" I don't see for any instance why the water works committee should not inspect the works as often as possible, find out defects, suggest remedial measures and measures of economy &c Some of the present members of the committee at least are themselv are proprietors of large industrial concerns in which extensive modern machinery is employed and may be expected to know some thing of the "technical aspect of mechanical contrivances Instead,therefore of enlisting their sympathy and cooperation by giving due considerations to their opinions and views, we are, on the other hand, to pooh pooh them and treat all their suggestions with scorns it was naturally lead to strained feelings between the council and the staff I have time and again pointed this out to the Municipal Engineer but apparently without effect If,therefore, there is any discontent among the staff as stated by the Executive Engineer I am sure that fault is no all on one side He has still to see the other side of the affair If the present report is compared with the past ones, it may be judged whether the council has taken a real interest in the works or not or whether they have not sanctionedlarge amounts of expenditure to set right the defects pointedout by the inspecting officers In the present report very few suggestions or improve ments indeed have been made and some of these have already been anticipated & acted upon by the council at the instance of the municipal Engineer himself which is in itself a testimony to the facts that the council is not unreasonab obstructive to the water works staff To say therefore that the staff do not seem to be contented and that in consequence the work is not going on smoothly or to draw sweeping conclusions from the mere fact that the water supply was stopped for two or 3 days owing to the floods, is to say the least, quite unwarranted Even the best ordained works of men are sometimes dislocated by the acts of God as may be instanced by the recent failure of the water works in such a large city as Bangalore where the staff being free from annoyance of meddlesome non-officials might be expected to be some what "contented and happy The entire blame for the temporary inconvenience to the Davangere publ c cannot therefore be laid at the doors of the council They cannot be saddled with the decrease of Providence or the results of some inherent defects in the layout of the original works themselves It is evident from such random remarks made by the Executive Engineer that he has been prejudiced against the council by what the Ml Engineer, has told him though I tried to place the case of the council also before him Just because the present Municipal Engineer cannot get on amicably with the councillors it does not mean that the works are going to the dogs or the whole of Davangere is in eminent danger of collapse by drought as pointed already the Executive Engineer has very few points indeed which the council have not already anticipated and the charges against the council are therefore quite unwarranted I do not mean to say that the council is omniscient or infallible but what I protest against is unmerited attacks by the D P W against the council because some of their officers cannot get on smoothly with it A mountain is being made out of a mole-hill and unnecessary anxiety caus

to Government by a vague remark that the staff is discontented I have not heard what this discontent is so far except as I have said before that the Municipal Engineer in spite of my frequent friendly advices to him does not know how to get on with the councillors Under these circumstances therefore it would be better for all concerned that all discontented hands should be immediately removed and other sphears of contentment and new ones appointed in their plac s I have been constrained to write at such length in order to remove any misapprehensions that may be created by the report under notice and to place before the Deputy Commissioner the other side" of the matter I shall be ready to explain things more in detail when the special meeting is convened

"C O P Y"

For Deputy Commissioner
Chitaldrug District

Letter No 160/28-29 dated 22-1 1929 from the President, Davangere Municipality to the Deputy Commissioner, Chitaldrug District

With refe ence to your memo No A-6 C 690/28-29 dated 5-1-1929 forwarding copy of letter No L 4449-55/M1 192-28-2 dated 22-12-1928 from the General Secy to Government and calling for the opinion of the Municipal council on the suggestion made by the Secy to Govt Public Works Dept regarding the management of all the water works in the State now under the municipalities being transferred to the Public Works Dept by creating a separate Sub Division including Davangere, Shimoga and Harihar, I have the honor to state that the Davangere Municipal Council carefully considered this question in all its aspects in their meeting specially held on the 12th instant and resolved that as their water supply has been much improved at present by the replacement of all worn out spare parts of the machinery at a cost of Rs 8000 and as all the defects pointed out from time to time by the Executive Engineer water supply Division have all been removed there was absolutely no necessity to transfer the control to the P W D They were also of opinion that from their past experience such an arrangement would not be in any way satisfactory and that therefore the Government be requested to leave the management in their hands only as heretofore Copy of the resolution is enclosed for ready reference

As the President in council, I may also be kindly permitted to state my views on the subject in question which are as follows - The Davangere water works were opened to the public in the year 1917 and were managed by the P W D till 4-10-1921 As the Dept used to charge the municipality annually with 18% supervision charges over and above the actual outlay towards maintenance charges the Municipal council in the month of October 1920, at the suggestion of the then Deputy Commissioner entered into the question of managing the works by themselves securing the services of an Engineer from the P W D and thought that by such a course they would, not only save the supervision charges but would also attend to the defects if any, then and there and thereby assure a satisfactory supply of water When this question went up to Government they were pleased to sanction the proposals in their order No R 11646-8/M1 131-20-4 dated 20-4-1921 subject to the condition that the Superintending Engineer should examine the works once in 6 months and offer advice and that the Engineer selected by the Municipal council to supervise the works must be an officer lent by the Public Works Dept In accordance with the above Govt order the services of one Mr K S Hutchu Rao B A ,B E , Sub Asst Engineer of the Water Supply Division were placed at the disposal of the municipality and the management of the works was also transferred to the Municipality on 5-10-1921 From that date the municipality is managing the works according to the instructions and advice given by the officers of the Water Supply Division from time to time In addition to the usual maintenance charges of the works they have spent a large amount year by year on special works and other necessaries At the time of handing over the works to the municipality by the Public Works Dept there were only about 20 @B public Taps and 36 house connections At present their number has been increased to 70 and 222 respectively in addition to 4 connections for factories and other non domestic purposes From this alone it may be judged how far the water supply has been improved during the past 7 or 8 years No doubt there was some trouble for water for a few days in the years 1924-25, 1926-27 and 1927-28 on account of some unforeseen and unavoidable causes such as high floods in the river, accumulation of silt in the intake pipe and break down of machinery respectively Even then the municipality took prompt action and restored the supply ofwater to the town within a short space of 3 or 4 days On an inspection of water works made by the Executive Engineer, water supply Dn on 15-8-1926 he had sent up a note to the Govt containing facts which were not quite true but based on the information furnished by the previous Engineer who was then in charge of the works and who was for several reasons going at a tangent with the council and their Executive This was sent to the Deputy Comr for rectifying the defects, after calling for a special meeting of the municipal council for the purpose The reply submitted to the Govt by the Deputy Comr has been recorded in their order No L 4224-5/M1 71-26-9 dated 3-1-1927 A kind perusal of the file and also copy of remarks recorded by my predecessor on that note which is enclosed herein will clearly show as to what part the Municipal Engineer had played in misrepresenting facts connected with this Department

The notes of inspection of the very same officer on 31-3-1928 which forms the basis for the present proposal for the transfer of the management of the works to the P W D does not also represent the true state of things The detailed report of the present Municipal Engineer on the present condition of the water supply system of Davangere already forwarded with this office No 155 dated 7-1-1929 will clearly show that the water supply has been greatly improved and that there is no reason for any complaint from the public

In para 2 of the note of the Secretary to Government P W D it is said that the pumping plant of the Davangere water works is not working efficiently I ma

be permitted to state in this respect that the facts are otherwise. Two sets of spare parts costing Rs 8000 were got recently and all the worn out parts have been replaced with the result that the plant is working to its maximum capacity This was tested by the Municipal Engineer on 6-11-1928 and found to be so

The water works system is now placed on perfectly satisfactory condition, thanks to the hormonious relations that exist between the Municipal council and the present Municipal Engineer and the efficiency with which the plant is managed

Under the above circumstances, I request you to be so good as to place the above facts before Government and to obtain their kind orders to allow the existing arrangements to continue

of the special meeting of the Davangere town Municipal held on 12-1-1929

Present:- S Abdul Khalak Esq Sub Division Officer, Davangere (President)

X X X X

Subject No I - Deputy Commissioner's memo No A-6 C 690/28-29 dated 9-1-1929 forwarding copy of letter No L 4449-55/M1 192-28-2 dated 22-12-28 from the General Secretary to Government and calling for the views of the Municipal council regarding the proposal made by the Secretary to Government Public Works Dept to take back the control of the Davangere water works to the Public Works Dept along with other 13 waterworks in the state

Resolution - The Municipal council have carefully considered this question in all its aspects The water supply is very much improved at present and spare parts costing Rs 8000 were recently got and worn out parts of the plants were replaced In fact all the defects that were pointed out by the Executive Engineer, Water Supply Division have been removed At present there is absolutely no necessity to transfer the control to the P W D From our past experience we are of opinion that such an arrangement will not be satisfactory and we therefore request Government to leave the control in the hands of the municipal council

Sir,

Subject -- Supervising the working of the Water Supply Scheme in the Magadi Municipality

With reference to your letter No L 4449-55/M1 192-28-2 dated 22nd December 1928, forwarding a copy of a note No 631 dated 26th November 1928 of the Secretary to the Government, Public Works Department, suggesting measures and calling for an opinion of the Municipal Council in the above matter, I have the honour to state that the President in his report No 128/28-29 dated 5th February 1929 states that the Gauramma tank, repaired by the Government and meeting the present water supply needs of the town, has neither a pumping or pipe arrangement and hence no professional supervising agency is necessary for the purpose entailing unnecessary expenditure from the municipal funds An extract of the resolution of the -- Municipal ~~funds~~ council in the matter is enclosed herewith for kind perusal

SIR

With reference to your letter No L 4449-57/ H 192-28-2 dated 22nd December 1928, for which copy of Public Works Department Secretary's note re the satisfactory working of the water supply schemes in the District, I have the honor to state that on perusing the copies of the resolutions of the Councils concerned, it is found that only the Municipal Council of Chikmagalur are agreeable to the temporary transfer of the Scheme

2 The Councils of Koppa and Mudigere are not in favour of the proposal, as their financial condition does not permit any increase in their expenditure and the Kalasa Council state that the proposal will be discussed on receipt of information as to the probable amount of expenditure that may have to be incurred by them on transfer of the scheme

3 Report of the Chairman of the Kalasa Panchayet shows that the Panchayet are agreeable to the transfer of their scheme provided the annual working charges do not exceed the amount which is now being incurred viz Rs 111/-

3 The copies of the resolutions of the Municipal Councils concerned

Municipal Council, Chikmagalur

concerned and that of the Malasa Panchayet are enclosed for

MEASURES FOR SATISFACTORY WORKING OF WATER SUPPLY SCHEME IN THE YEDATORE AND NANJANGUD MUNICIPALITIES

In continuation of my letter No D2 2556/28 dated 14th March 29 I have the honour to state that the Municipal Council Yedatore in their meeting held on 28-2 29 resolved that as the old town has to be vacated as soon as the buildings in the new town are ready for occupation the management of the water supply scheme to the Town might be allowed to rest with the municipality

Under the circumstances I agree with the Municipal Councils in the matter

I have the honour to be

Inspection ote on Srikanteswara ater orks
at arjangud

******

Date of Inspection - 17th ugust 1929

The President of the Municpal Council was kind enough to be present during t e inspection The pumping station was found to have been electrified since the last inspection in December 1928, but on the date of inspection, the electrical pumping plant was not working I was informed that the bed plate of the centrifugal pump developed a bad crack near the foundation bolt hole about a couple days previou ly and t at the pump had been taken to Mysore for Repairs The elec. tric ~~motion~~ motor only was in its place The pumping was being managed by t e old Pulsometer Engineering Company's Centrifugal pump and the motive power supplied by the Crossley Oil Engine As this pump has been working almost continuously for several years, it is necessary t at t e electric pump should be repaired and got ready for working without any delay

The low lift pumping set consisting of a 7 H P Peter Crude Oil Engine and a Mather & Platt cen rifugal pump was also found working in order to pump water from the river to the suction well This set was reported to consume 3 gallons of Crude oil a day The ~~electric~~ suction lift for t e high level pumping set was found to be only 15 feet and as such the necessity for the low ~~light~~ lift pump being worked at this season of the year is not clear The Head Driver was accordingly instructed to stop the low lift pump a d try working the high lift only e mentioned that it might be necessary to work the h gh ~~light~~ lift set for a longer period as the discharge gets reduced as a result of stopping t e low lift e was asked to try t e arran ement for a few days and note t e result

The condition of the filters did no show any sign of i provement There was no alum in stock on the date of inspection The filters were being worked without alum for t e previous two days Stock ordered was expected in a day or two The rapid filt rs

t ful

the filtration at Nanjangud is very low When asked, the Head Driver mentioned that the filters had not been over ~~handed~~ hauled for some years The condition of the strainers and the sand inside is not known Such a state of affairs not only interfers with the satisfactory functioning of the filters but may also add to the frictional resistance ~~to the frictional resistance~~ over the pump It is therefore necessary to overhaul the filters immediately

The Hornsby Oil Engine noticed in the last inspection Note is still lying in a neglected condition outside the pumping station The parts are likely to get lost The Engine should be assembled and kept

The leaks in the 5" rising main referred to previously have not been attended to

The pressure in the fountains in the Town appears to have dropped, this might be due to incrustation in the distribution pipes

The President mentioned to me that he had made a recommendation for retransferring the working of the water supply system to the P W D I fully agree with him that the work should be controlled by the Water Supply Division in the interest of efficiency

The President also expressed to me that his idea is to have a new pumping station near the Service Reservoir, the supply being taken from the Hulhalli channel His scheme provides for the construction of an elevated service reservoir near the Munsiff's Court As I am not in full possession of all the details, I could not -- express any opinion on the scheme

SIR

Re TRANSFER OF KADUR WATER WORKS TO PUBLIC WORKS DEPARTMENT

In continuation of my letter No A3-1154-29 dated 16-2-32 on the above subject, I have the honour to state that on receipt from the Executive Engineer, Water Supply Division, of details of cost that will have to be borne by the Municipality after the transfer is effected, the President of the Municipal Council was requested to obtain the opinion of the Council on the subject The Council resolved on 30-4-32 that the control of the water works may remain, as at present, with the Municipal Council

The Municipal Council have been incurring a recurring expenditure of Rs 676/- per year and if the pay and allowances of a Sub Overseer on Rs 35 - 5/2 - 80 and other incidental and statutory charges are added there will be a heavy burden on the slender resources of the Municipality

I am therefore of opinion that the question of the transfer of Water Works to the Public Works Department may lie over until such time as the finances of the Municipality improve

A cppy of the resolution of the Municipal Council referred to above is enclosed for information of Government

I have the honour to be,
Sir,
Your most obedient servant,

No L10474/Rel

To The Director of Public Health,
in Mysore, Bangalore

Sir

Subject - Transfer of the Water Supply Wo. under the Control of local bodies to the Bureau of Sanitary Engineering

With reference to the Correspondence ending with your U O Note C 601-10, dated 27 9 34 on the above subject, I am directed to observe that the transfer of the Control and management of all the town water supply installations to the Bureau of Sanitary Engineering would involve serious financial difficulties and to state that then maintenance may be taken over by the Bureau only in special

cases — Govt however consider that as a general rule it will be sufficient if the officers of the Public Health dept (Bureau of Sanitary Engineering) inspect the installations regularly, and bring to the notice of the Dy Commissioners of Distts any defects that Govt should be remedied so that local bodies concerned may be requested to comply with the advice of your Dept, if it is reasonable and does not involve expenditure beyond the capacity of the local body — — —

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

No L10474/aC 192-38 General and Revenue Secretariat,

Dated Bangalore 193

FROM

Secretary to the Government of His Highness the Maharaja of Mysore

To

Local Self-Government Department.

The Director of Public Health in Mysore,

SIR Bangalore.

Subject - Transfer of the water supply schemes under the control of local bodies to the Bureau of Sanitary Engineering.

With reference to the correspondence ending with your U.O. Note C.Col-10, dated 7th September 1931 on the above subject, I am directed to observe that the transfer of the control and maintenance of all the town water supply installations to the Bureau of Sanitary Engineering would involve serious financial difficulties, as the state of their maintenance may be taken over by the Bureau only in a normal condition. Government, however, consider that, as a general rule it will be sufficient if the officers of the Public Health Department (Bureau of Sanitary Engineering) inspect the installations regularly, and bring to the notice of the Deputy Commissioners of Districts any defects that should be remedied, so that local bodies concerned may be requested to comply with the advice of your Department if it is reasonable and does not involve expenditure beyond the capacity of the local body.

Necessary instructions may kindly be issued accordingly to the subordinate officers of your department in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

for Secretary to Government,
Local Self-Government Department.

---

Transfer of Water Supply Works under the control of the Local Bodies to the Bureau of Sanitary Engineering

--

With reference to G O No L 10474/ 1 192-28 dated 30 6 38 observing that the transfer of the control and management of all the town water supply installations to the Bureau of Sanitary Engineering would involve serious financial difficulties and that it may be taken over by the Bureau only in special cases, I have the honour to state that the Annual Maintenance of Water Supply works of Municipalities may be made over to them from the commencement of the year as ordered, as debiting such charges to Objection Book Advances in the first instance pending recovery from the Municipal Councils is irregular The names of Annual Maintenance Works which will have to be looked after by the Bureau as a special case may kindly be intimated and sanction of Government obtained thereto

Director of Public Health

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE

General and Revenue Secretariat

Dated Bangalore 4th August 8

No L 1136/ML 92-38

From

Secretary to the Government of His Highness the Maharaja of Mysore
Local Self Government Department

To

The Director of Public Health in Mysore,

Bangalore

Sir

With reference to the correspondence ending with your letter No C 71-4 dated 16th July 1938, soliciting instructions of Government regarding the transfer to the local bodies of water supply works already under the control of the Bureau of Sanitary Engineering etc , I am directed to state that order No L 10474/M1.192-38 dated 30th June 1938 was intended to convey that all water works need not in future, as a matter of course, be taken over by the Public Health Department It might also be examined whether any individual water supply now managed by the Public Health Department may be handed back. The intention of Government was not that the water supply works should be handed back in a body except in cases where there are special reasons for not transferring the management.

I am to add that the Government Order No.L 26-46/M1 181-37-4 dated 2nd July 1938 gives sufficient powers to the Public Health Department to recover the maintenance charges, without permitting accumulation, even if the management is retained by the Department of Public Health in cases where the management is already with the Department

I have the honour to be,
Sir,
Your most obedient servant,

Sd/- P H Krishna Rao,
Secretary to Government,
Local Self Government Departmen
